

Medical furniture made of powder-coated steel

Furniture construction made of double zinc plated varnished sheet, powder-coated with silver ions active ingredients - natural antibacterial agent IGP-DURA®care. Front & body made in double-walled system with moisture resistant, stiffening & noise-damping insulation, ensuring no empty metallic sound while opening & closing doors and drawers.

Smooth internal walls of high cabinets and cabinets are structurally equipped with specialized rails (rasters) enabling easy adjustment of the height of the position of the inside mounted components such as shelves, baskets and cuvettes. Shelves made of powder-coated galvanized steel with step height adjustable on L-shaped brackets made of aluminum alloy.

30mm thick worktops, described in detail in the additional equipments section, are available in two variants:

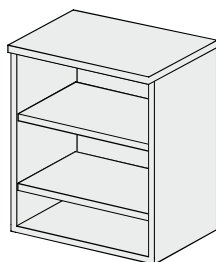

- stainless-steel with stiffening & noise-damping insulation;
- made of composite material with non-porous surface, with an anti-bruise groove.

OPEN TYPE SUSPENDED CABINETRY

REF: KL104 103

Single-compartment cabinetry
2 x adjustable shelf

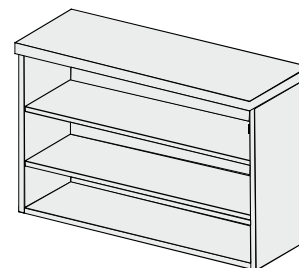

Dimensions (mm)*
